

IN THE CLAIMS:

Please amend the claims as follows (all claims listed):

1. (Currently Amended) A method of providing information to a user comprising:
collecting information at a first computer system;
~~organizing said information into~~ creating a plurality of first web-sites at said first
computer system from said information, each of said first web-sites being addressable by a
unique Universal Resource Locator (URL) and each of said first web-sites being identified by a
physical location;

assigning one of said first web-sites to a user as a user web-site; and

selecting links to a plurality of said first web-sites, other than said user web-site, for
presentation on said user web-site based on a relationship between the physical locations
identified by said first web-sites and the physical location identified by said user web-site.

2.. (Original) The method of claim 1 further comprising:

accessing said user web-site by said user.

3. (Original) The method of claim 1 wherein said location associated with said user web-site is
the physical location of a computer system of said user.

4. (Currently Withdrawn) The method of claim 1 further comprising:

specifying the physical location associated with said user web-site by said user.

5. (Currently Withdrawn) The method of claim 4 wherein the physical location associated with said user web-site is based on a current telephone number at which the user is located.

6. (Currently Withdrawn) The method of claim 5 wherein said user specifies said physical location at a first time, the method further comprising:

modifying said predetermined physical location by said user at a second time.

C¹
7. (Original) The method of claim 2 wherein the user's computer system is coupled to the first computer system via the Internet

8. (Currently Withdrawn) The method of claim 7 wherein the user's computer system is coupled to the Internet via a telephone connection and said physical location is based on a location of said telephone connection.

9. (Original) The method of claim 1 further comprising:

defining a local area relative to said physical location associated with said user's web-site such that the physical locations associated with said selected links to the plurality of first web-sites is in said local area.

10. (Original) The method of claim 9 wherein said local area is a circular area having a predetermined radius from the physical location associated with said user's web-site.

11. (Currently Withdrawn) The method of claim 9 wherein said local area is a political area including said the physical location associated with said user's web-site

12. (Currently Withdrawn) The method of claim 9 wherein said local area is a zip-code area including the physical location associated with said user's web-site.

13. (Currently Withdrawn) The method of claim 9 wherein said local area is a square area including the physical location associated with said user's web-site.

14. (Original) The method of claim 9 wherein said local area is a circular area having a radius from said physical location associated with said user's web-site such that said circular area includes a threshold amount of entities.

15. (Original) The method of claim 14 wherein said entities are telephone number connection locations.

16. (Currently Amended) A method of providing information to a user comprising:

collecting information at a first computer system;

~~organizing said information into~~ creating a plurality of first web-sites at said first computer system from said information, each of said first web-sites being addressable by a unique Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location;

assigning one of said first web-sites to a user as a user web-site;

selecting links to a plurality of said first web-sites, other than said user web-site, for presentation on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site; and accessing said user web-site by a second user.

17. (Currently Amended) A system for providing information to a user comprising:

C) a first computer system adapted to collect information and organize said information into a plurality of first web-sites, each of said first web-sites being addressable by a Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location, said first computer system further adapted to assign one of said first web-sites to a user as a user web-site and present links to a plurality of said first web-sites, other than said user web-site, on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site.

18. (Original) The system of claim 17 wherein said first computer system is adapted to define a local area relative to said physical location associated with said user's web-site such that the physical locations associated with said selected links to the plurality of first web-sites is in said local area.

19. (Original) The system of claim 18 wherein said local area is a circular area having a predetermined radius from the physical location associated with said user's web-site.

20. (Currently Withdrawn) The system of claim 18 wherein said local area is a political area including said the physical location associated with said user's web-site

21. (Currently Withdrawn) The system of claim 18 wherein said local area is a zip-code area including the physical location associated with said user's web-site.

22. (Currently Withdrawn) The system of claim 18 wherein said local area is a square area including the physical location associated with said user's web-site.

23. (Original) The system of claim 18 wherein said local area is a circular area having a radius from said physical location associated with said user's web-site such that said circular area includes a threshold amount of entities.

24. (Original) The system of claim 23 wherein said entities are telephone number connection locations.

25-43 (Currently Withdrawn)
